THE COURSE

WHO SHOULD ATTEND?

Emergency Medicine providers including attending physicians, resident physicians, nurses and paramedics. If you've listened to the EM Cases Podcasts and want more great EM education through direct interaction with our EM Cases experts, this course is for you!

Even if you haven't heard the podcasts, this is your chance to talk face-to-face with Canada's brightest minds in Emergency Medicine about cases, questions, controversies, pearls, pitfalls, tips and tricks to make you a better Emergency provider.

No more sitting amongst hundreds of people listening to one didactic lecture after another! This is your chance to be engaged in your learning in small groups, and get CME credits while you're at it.

WHAT YOU GET

- ✓ Small-group case-based interactive discussions with EM Cases Podcast guest experts on key clinical topics that you choose such as stroke, cardiac arrest, orthopaedic pearls, pitfalls and more
- ✓ Access to our FOAMed bar where you can learn tips and tricks on how to navigate Free Open Access Medical Education resources from the EM Cases Team
- ✓ CME credits
- ✓ Network with your colleagues and with the brightest minds in the Canadian EM landscape
- ✓ Free prizes!
- ✓ Day 2 dedicated to simulation sessions, ECG and Orthopedic workshops and expert debriefs on topics covered

Tickets on sale Nov 10th 10am EST

SCHEDULE

7:30

Registration & Continental Breakfast

8:00

The Unwrap with Anton Helman

SCHEDULE

DAY 2: SIMULATION DAY

EM Cases Virtual Simulation is a new addition to the EM Cases Course. Designed by Dr. Sarah Foohey, the simulations are designed to give practicing physicians an opportunity to practice what they've heard in the main episode podcasts, read in the show notes and Just the Nuggets emails and discussed at the EM Cases Course. The small groups allow for a practical experience in a variety of challenging emergency medicine scenarios with intimate, personalized debriefing by content and simulation experts. This is your opportunity to practice your management skills in cases that you might not see too often, but that require team-based rapid decision making to improve patient outcomes.

WHAT YOU GET

- ✓ Small group case-based simulation sessions and debriefs including trauma, cardiac arrest with POCUS integration, undifferentiated shock, and more with EM Cases content and simulation experts
- ✓ Networking and working with colleagues in the Canadian EM landscape.
